### Best Research Award

Prof. Yumei Li, The First Hospital of Jilin University, China

### Best Researcher Article Award

Prof. Christopher Coe, University of Wisconsin-Madison, United States

# About Venue

## San Francisco, United States

San Francisco, located in northern California, is one of the most iconic cities in the United States. Known for its hilly landscape, cool foggy weather, and cultural diversity, the city is a major hub for finance, technology, and tourism. The Golden Gate Bridge, with its striking red-orange color, is a world-famous landmark and a symbol of the city. San Francisco is also home to Alcatraz Island, the former prison that once held notorious criminals, now a popular tourist attraction. The city's neighborhoods each offer unique charm—Chinatown, one of the oldest and largest in North America, is vibrant with shops and restaurants, while the Mission District boasts colorful murals and a rich Latino heritage. San Francisco played a key role in the LGBTQ+ rights movement and continues to be a center of progressive politics. The city is part of the broader Silicon Valley region, known globally for its tech innovation. Its historic cable cars still transport passengers up and down steep streets, adding to the city's charm. Despite its beauty and innovation, San Francisco faces challenges like homelessness and high living costs. Nonetheless, it remains a captivating destination blending natural beauty, rich history, and a spirit of resilience and innovation.
